

Week Without Walls Program  
2013/1014  
Offered Projects

**Local Projects:**

Project One: Refurbishment of a small school that consists of six classrooms. The project will be focusing on painting, providing suitable floor covering, simple electric equipment and some simple furniture if the offered budget meets that. The completion of the project will help provide a better educational environment for the kids.

Project Two: Providing one of the public parks with a small jungle gym for the children with special needs. We will be given a part from one a park in Khobar where the group will be working preparing and installing these toys next to the ordinary play gym to prepare its environment to these special kinds of children.

Projects Three and Four: Refurbishment for two houses of two Saudi families. The groups involved in these projects will work towards providing paint, electric installments, essential furniture and fixing any water malfunctioned connections. The completion of these projects will help ensure a safer, healthier and more comfortable familial environment to the two families.

**International Projects:**

There will be two international projects in one Arab country under full supervision and administration of the school. The two offered projects will be the same as projects Three and Four in the local projects. The service will be offered to two needy Arab families.
